

EZ-LOC ADJUSTABLE FOOTPLATE KIT MODEL QM-AF-EZL PARTS AND INSTALLATION INSTRUCTIONS

The addition of the adjustable footplate kit to the EZ-LOC SCBA bracket allows for on-the-fly adjustment. With just a few turns of the knob, the footplate can be shifted up or down to compensate for variations in the length of the cylinder.

Installing an Adjustable Footplate

1. Remove the footplate from the SCBA backplate.
2. Thread (1) 5/16-18 nut, (1) 5/16" washer, and (1) spacer to the short-threaded end of the rod until the top of the spacer and top of the rod are 1-1/2" apart.
3. Slide the rod up through the upper bracket adjustment hole to the right of the top clip.

4. Thread the long-threaded end into the footplate.
5. After greasing the footplate spacers, slide them together to make rollers and install them on the footplate mounting bolts. (Rollers should be between the footplate and mounting block.) Both rollers should be seated in the back plate slot.
6. Adjust the nut at the upper bracket so that the threaded rod extends 1-1/2" inches above the top of the spacer.

QM-EZL-F shown with adjustable footplate

7. Thread (1) nylon washer, (1) 5/16" washer, and (1) 5/16-18 nut to the top of the threaded rod. Tighten the 5/16-18 nuts against the spacer above and below the upper bracket.

8. Run one (1) 5/16-18 nut down the top part of the rod far enough that the knob can be threaded until it bottoms out. Once the knob bottoms out, tighten the 5/16-18 nut against the knob.

(Refer to 1026PM1-3 for QM-EZL-__ Adjustment Procedures.)

ITEM NO.	PART NUMBER	DESCRIPTION	QTY.
1	1045-320-113	Adjustment Rod	1
2	1045-320-137	Spacer	1
3	9114-113100	Flatwasher, 5/16"	2
4	1045-320-175	Knob	1
5	9015-113100	Hex Nut, 5/16-18	3
6	1045-320-197	Spacer Sleeve, Footplate	2
7	1045-320-199	Spacer, Footplate	2
8	3097-105-130	Nylon Washer, 3/4" O.D.	1
