Attach Lanyard Assembly here. Lanyard Assembly tab serves as flat washer.

Slide Retaining Pin through hole in Band Clamp latch to secure.

Mount at four points with Grade 5, 1/4" Type 4 hardware.

Note that two fasteners sets must go through the bottom holes of the Base Bracket and that two fastener sets must go through the shared holes of the Retainer Bracket and the Base Bracket.
Adjustment Instructions:

WARNING: QM-FEH-1 is to be secured with a minimum of Grade 5, 1/4” Type 4 fasteners and washers. Failure to do so may result in non-compliance with safety standards.

WARNING: Be careful not to kink the Band Clamp (3) during adjustment procedures.

1. Attach the Retainer Bracket (1) to the Base Bracket (2) using the recommended mounting hardware. Hardware should be long enough to pass through both brackets and the desired mounting surface.

- If storing an Amerex Model B500 extinguisher: attach the Retainer Bracket to the Base Bracket above the Band Clamp, using the upper set of holes in the Retainer Bracket.

- If storing a Kidde Pro Series 340 extinguisher: attach the Retainer Bracket to the Base Bracket above the Band Clamp, using the lower set of holes in the Retainer Bracket.

2. Secure the Lanyard Assembly (6) to the Retainer Bracket at this time, using the right side adjustment hole. The Lanyard Assembly doubles as one of the two required washers (see Page 2).

3. Place the extinguisher into the assembled QR-FEH-1 and close the Band Clamp latch. The Band Clamp should be tight against the extinguisher without restricting access or operation of the latch. Adjust the Band Clamp by turning the screw beside the Band Clamp Cap (5).

Mounting Instructions:

Mount horizontally or vertically at four points to any flat surface using a minimum of Grade 5, 1/4” Type 4 fasteners and washers (see Page 2). Failure to meet these requirements may result in non-compliance with safety standards.

Operation Instructions:

1. To stow the extinguisher:

- Place the extinguisher against the Base Bracket (2), inside of the Band Clamp (3) and resting on the footplate. The neck of the extinguisher should sit fully inside the Retainer Bracket (1).

- Hook together and fully close the Band Clamp latch. Slide the Retaining Pin (6) through the small hole in the Band Clamp latch to secure. Failure to use the Retaining Pin may result in non-compliance with safety standards.

2. To retrieve the extinguisher:

- Remove the Retaining Pin (6) and open the Band Clamp (3) latch.

- Pull extinguisher free from the Retainer Bracket (1).
